

CYBERFIT

SHARED SERVICES TO ADVANCE OUR CYBER HEALTH

Serving the NH-ISAC Community

What is CYBERFIT?

CYBERFIT is a group of added security services offered by the NH-ISAC focused on reducing cyber security risks within the healthcare community.

CYBERFIT provides organizations with affordable access to shared data and enhanced security services to help them evaluate their cyber security posture. Services include access to a unique repository of third party risk assessments, and provide penetration testing, vulnerability scanning, perimeter monitoring and incident/malware analysis.

CYBERFIT helps organizations gauge their risk tolerance among peers and map a path toward managing and monitoring their internal and third party vendor risk.

SUCCESS STORIES

Have you seen the CYBERFIT Legal & Regulatory Newsletter?

The **CYBERFIT Legal & Regulatory Surveillance** service provides news updates and key alerts on legal, policy, and regulatory changes.

Policy and regulatory updates include, but are not limited to, privacy and security updates for new and proposed legislation and regulations and court decisions.

The Legal & Regulatory Surveillance service is free to NH-ISAC members and has been effective since July, 2016. For more information on the newsletter: <https://www.nhisac.org/legal-and-regulatory/>

NH-ISAC 2016 Cyber-Top Gun Summit November 14-16

Vendors become key players in the Healthcare Security supply chain. We need to address this additional risk as we grow the offering for our patients with the services we provide.

Please join us to network with the best practitioners, who are also your peers in the Healthcare Security.

For more information, review Summit details: <https://www.nhisac.org/conference/>

WHAT'S NEW & WHAT'S COMING

The **CYBERFIT Benchmarking** service provides an assessment of your cybersecurity strategy, physical as well as cyber controls, governance & organizational processes and standard operating procedures.

The service will compare your organization's information security maturity to your peers'. You can use your assessment report to drive internal budgeting, planning and sourcing of third party tools or talent.

The Benchmarking service is free to NH-ISAC members and will fully launch 11/2016.

The **CYBERFIT Shared Risk Assessments for 3rd Parties** service provides automated evidence collection & risk assessment designed specifically for the Healthcare industry to measure third-party vendors for security and data risk. The service will include:

- Standardized model for evidence collection designed to create a baseline across products, services, & vendors with industry common criteria for risk assessment & remediation.
- Access to comprehensive vendor repository evidence is immediately available to apply to your own risk assessment processes.
- Standardized CYBERFIT model for evidence collection designed to create a baseline across products, services & vendors with industry common criteria for risk assessment & remediation.
- Access to comprehensive vendor repository evidence is immediately available to apply to your own risk assessment processes

CYBERFIT Security Operations services will provide vulnerability scans, penetration tests, malware analysis & incident response. The service will offer

- A central point you can call into during an incident to receive help over the phone
- Pre-negotiated discounted rates without the need for a pre-established retainer
- Access to best-in-class tools to advance your organization's cybersecurity

This service will make it easier for you to obtain tailored services from trusted vendors and receive personalized recommendations for remediation.
